Re: East Islip Public Library

TMS Project Number 5523

Dear Mr. Mancini:

I am writing this letter for a very different reason than a construction manager would normally write a letter to a contractor. I am writing this letter to personally thank you and your project supervisor John Woods for your cooperation, efficiency and attention to detail on this project.

Corporate Electrical Technologies ability to keep pace with construction regardless of how slow or how quick the pace made life on this project easier for all prime contractors.

Corporate Electrical Technologies value engineering ideas brought money and time back to our budget and schedule; two very important factors in relation to the extremely tight budget and construction schedule.

I thank you again for your efforts and hope to work with you and your firm in the future.

Please feel free to contact me at the Thomas Management field office should you need any additional information.

  
Sincerely,

**Thomas Management Services, LLC**

Alex Manno  
Project Manager
