Bellmore, New York 11710

Attn: Raymond McQuillan

Ray,

Please accept this letter as my sincere thank you to Corporate Electrical Technologies, Inc, (CET) and respective team of on site technicians and supervisors for the successful opening of the Valley Stream, NY, Kids R Us.

Given the existing circumstances, complied with a 3-week deadline, CET accomplished what seemed impossible, and performed as true professionals, without sacrificing quality. Your guidance through our design/value engineering process, along with your ability to coordinate, schedule, and work with the other trades was crucial in meeting both our budgetary and completion objectives.

While our other projects have all been successful, CET's performance in Valley Stream, NY makes me truly believe that there still is pride in hard work, and such is evident throughout this store.

Please extend Kids R Us appreciation to your entire team, as I look forward to working with you again.

A handwritten signature in black ink, appearing to read 'Frank Onorato', with a long, sweeping underline.
